

Roadbook

The roadbook and the overview maps are now ready, but from experience we know something often happens at one or more places on the course in the last time before the start of the race. Hopefully we will avoid changes this year, but to be as safe as possible we will drive through the entire trail approx. 1 week before the start. We will inform the participants of any changes we then find that we have to make. Follow along online until the start of the race!
